

MONITORING

24/7 CONTROL ROOM MONITORING

When one of our CCTV systems is coupled with our highly tailored remote monitoring service, we can provide the peace of mind you need 24 hours per day, 365 days per year.

MOBILE MONITORING

Using our mobile app, you can connect to your site from anywhere in the world. All you need is our app and a web connection. Once installed, use the app to connect to your site and view real-time images from your site cameras.

TIMELAPSE SERVICE

Our Time Lapse service provides a visual record of your project progression. We can provide start to finish visuals no matter the length of the project. This features live images and regularly updated videos.

RAPID RESPONSE

If there is an intruder detected on your site, we are alerted immediately and are able to respond to all incidents rapidly and effectively through our CCTV systems and Immix Alarm platform.

MONITORING

INTRUDER ENTERS SITE

High definition CCTV cameras monitor your site 24/7 looking out for any suspicious activity.

DETECTION TRIGGERS/ALARM

Passive infrared detector is activated as intruder passes. Detector triggers an alarm to be sent to control room with a real time video stream of related camera footage.

CONTROL ROOM ANALYSE THE THREAT

Operator opens alarm and reviews footage.

AUDIO WARNING ISSUED

If a threat is detected an immediate live audio warning is issued, this will usually result in the intruder leaving site.

INTRUDER TRACKED ON SCREEN

Monitoring operative tracks intruder and calls for response from either the police or our uniformed partners.

SECURITY RESPOND TO THE THREAT

Uniformed response detain/check for intruder and ensure site is secured again before leaving.
